PROFESSIONAL SUMMARY

Computer Science undergraduate with strong expertise in Data Structures, Algorithms, Object-Oriented Programming, and Distributed Systems. Experienced in building scalable, high-performance backend systems and AI-driven applications using Java, Python, and modern frameworks. Hands-on experience in system design, REST APIs, cloud-based development, and RAG-based AI systems. Passionate about solving large-scale engineering problems in distributed and high-performance environments.

TECHNICAL SKILLS

Languages: Java, C++, Python, JavaScript, C
Core CS: Data Structures, Algorithms, OOP, System Design, OS, DBMS
Systems: Distributed Systems, Scalable Architectures, High-Performance Systems
Frameworks: Spring Boot, React, Node.js, Flask
AI/ML: LLMs, RAG, Machine Learning, TensorFlow, Deep Learning, Langgraph, Langchain.
Tools: Git**,** Docker, CI/CD, Unix/Linux, Cloud Computing, Infrastructure Basics, DevOps Fundamentals
Databases: MySQL, MongoDB, Neo4j

EDUCATION

B. Tech in CSE (Research-Honors) - Vignan University (2023–2027) — CGPA: 8.56 / 10

Pre-University Course – RGUKT (AP - IIIT) - Ongole (2021–2023) — CGPA: 8.25 / 10

SSC - Narayana E.M. School (2020–2021) — Score: 592 / 600

PROFESSIONAL EXPERIENCE

❖ **AI Skill Integration Intern — Genzix** **July 2025 – Present**

- Developed **scalable multi-agent AI systems** using LangChain and LangGraph
- Built **RAG pipelines**, improving response accuracy by **~30%**
- Designed **backend services and REST APIs** for system integration
- Implemented **evaluation pipelines**, improving reliability and reducing hallucinations
- Worked on **distributed system architectures** for task orchestration in production-like environments

❖ **Java Full Stack Intern — Infosys Springboard** **February-April 2026**

- Developed scalable full-stack system using Spring Boot, React, MySQL
- Designed REST APIs handling concurrent users, Applied OOP, system design, and clean architectures.

PROJECTS

❖ ZapFix - Autonomous AI Agent System

- Built a distributed multi-agent desktop application using React, Tauri, and Bun runtime.
- Designed a multi-agent architecture where AI agents collaborate to execute complex multi-step tasks.
- Implemented RAG pipelines using LangChain and LangGraph to retrieve verified knowledge and support reasoning.
- Developed React dashboards and terminal interfaces to visualize agent reasoning chains and task execution.

❖ Timetable Generator — Constraint Optimization

- Developed automated timetable generator using Google OR-Tools CP-SAT solver.
- Model scheduling constraints including faculty availability and classroom capacity.
- Built Python optimization pipeline to generate clash-free timetables.
- Integrated solver backend with MERN administrative interface.

❖ CoderKytes- Fullstack Coding and tutorials Tracking Website

- Built a scalable full-stack platform using Next.js and Firebase to manage coding practice and learning workflows
- Developed backend services for tracking user progress, submissions, and problem metadata
  Integrated containerized code execution using Docker to safely run user-submitted programs
- Designed REST-based workflows for handling code execution requests and result retrieval
- Implemented real-time data updates and monitoring for user activity and submissions

❖ AI-Based Automated Grading System with Personalized Feedback

- Developed a cloud-native grading platform with FastAPI, React, and Firebase for real-time sync.
- Direct Screening from the answer sheets using the Tesseract- OCR,Applied NLP embeddings (BERT, TF-IDF) for answer evaluation and personalized feedback, reducing manual grading by 60%.

ACHIEVEMENTS

- TCS CodeVita Global Rank 9 — Top 10 out of 630,000+ participants worldwide
- Global Top 7% in Leetcode Contests
- Solved **700+ DSA problems** across competitive programming platforms
- 4-star coder in Codechef, Attended 70+ Competitive coding contests

---

CERTIFICATIONS

- **Cambridge English Qualification - Achieved B2 Level (Score: 162/170)**
- Data Structures & Algorithms in Java (Coursera/NPTEL/Infosys Springboard Courses) (Elite + Silver)
- Cloud Computing(Elite), Joy of Computing with Python (NPTEL))(Elite + Silver)
- Cisco Networking Certificates
